

Topic	Possible effect on product	Solution
Hardware and software platforms	Needs to run in multiple browsers	Proper HTML use
Performance requirements	Should run on an average computer	Write clean code that doesn't do crazy operations
Persistent storage and transactions	Needs to persist data	Databases
Usability	Should be usable for everyone	Accessibility focus in HTML
Budgets	I'll not get paid	Eat less
Time limitations	Might not get all the features one could wish for	Ensure MVP is finished
